PRATIK BHOSKAR

.NET Full Stack Developer

pratikbhoskar17@gmail.com | +91-9226281532 | linkedin.com/in/pratik-bhoskar

Professional Summary

Software Developer with 2.4 years of experience developing and maintaining web and desktop applications using C#, ASP.NET Core, ASP.NET MVC, Web API, Angular, and SQL Server. Experienced in RESTful API development, business workflow implementation, frontend-backend integration, and database operations. Familiar with Entity Framework Core, LINQ, Dependency Injection, Repository Pattern, and SOLID principles, with a focus on maintainable code, reliable functionality, and effective troubleshooting.

Technical Skills

- **Languages:** C#, JavaScript, SQL, TypeScript
- **Backend:** ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework Core, LINQ, ADO.NET, RESTful APIs
- **Frontend:** Angular, HTML5, CSS3, Bootstrap 5, jQuery, AJAX
- **Architecture:** OOP, SOLID Principles, Dependency Injection, Repository Pattern, Layered Architecture, DTOs
- **Database:** Microsoft SQL Server, Stored Procedures, Views, Triggers, Indexing, Query Optimization
- **API & Tools:** JWT, Role-Based Authorization, Swagger/OpenAPI, Postman, Git, GitHub, Visual Studio, SSMS, AI-Tools
- **Practices:** Agile/Scrum, SDLC, Debugging, Root-Cause Analysis, Performance Optimization, Application Maintenance

Professional Experience

Software Developer **June 2024 – Present**
CLARIMIND IT INNOVATION

Roles and Responsibilities

- Developed and maintained application features across housing management, ticketing, tourism, and accounting domains, contributing to requirements analysis, implementation, testing, and maintenance.
- Designed and built RESTful APIs in ASP.NET Core using layered architecture (Controllers, Services, Repositories), Dependency Injection, and DTOs, keeping business logic testable and easy to extend.
- Developed reusable Angular components and services integrated with backend APIs, with client-side validation and dynamic data handling for a responsive user experience.
- Implemented JWT authentication and role-based authorization so each user type (admin, chairman, agent, customer) accesses only the workflows meant for them.
- Worked with SQL Server Stored Procedures, Views, Triggers, and indexing to support database operations and improve query performance.
- Wrote business logic with C#, EF Core, and LINQ, applying SOLID principles, input validation, and structured exception handling to reduce defects.
- Resolved defects across frontend, API, and database layers through root-cause analysis, and verified fixes with Swagger and Postman.
- Worked in Agile/Scrum sprints, including planning, development, testing, and defect resolution, and managed code with Git/GitHub, including branching and merging.
- Analyzed project requirements and translated them into application modules, workflows, and technical tasks, coordinating frontend, backend, and database changes to meet functional requirements.
- Performed functional testing and regression checks for application features, verified API responses and database updates, and resolved issues before confirming that changes worked as expected.

Projects

CM Resident Hub

Technologies: C#, ASP.NET Core, Angular, Web API, Entity Framework Core, LINQ, SQL Server

- Led development of the Chairman Module for a housing society management application, supporting maintenance and expense review workflows.
- Developed maintenance bill approval and tracking functionality, including approval or rejection of occasional maintenance requests and indirect expense requests.
- Implemented chairman workflows for viewing maintenance and expense information, managing society staff, and assigning roles.
- Integrated Angular components with ASP.NET Core Web APIs and managed application data using Entity Framework Core, LINQ, and SQL Server.
- Worked with layered architecture using Dependency Injection and Repository Pattern to separate controllers, services, and data-access logic.
- Supported modules for members, maintenance, complaints, visitors, notices, and reports.

AgroHub

Technologies: C#, ASP.NET MVC, ADO.NET, SQL Server, HTML5, CSS3, Bootstrap, jQuery, AJAX

- Developed Visitor and FarmOwner modules for a tourism management application using ASP.NET MVC, C#, ADO.NET, and SQL Server.
- Implemented farm listing, search, booking management, and user profile functionality based on application requirements.
- Created responsive Razor Views using HTML5, CSS3, Bootstrap, JavaScript, jQuery, and AJAX.
- Integrated application functionality with SQL Server using ADO.NET and Stored Procedures for data retrieval and transaction processing.
- Implemented client-side and server-side validation, exception handling, and database query improvements to support reliable application operations.

Clear Ticket

Technologies: C#, ASP.NET MVC, ADO.NET, SQL Server, JavaScript, AJAX, Bootstrap 5

- Developed features for a web-based ticket management application with Admin, Team Leader, Agent, and Customer modules.
- Worked on the ticket lifecycle, including ticket creation, assignment, escalation, priority management, and resolution tracking.
- Created dashboard functionality for ticket metrics, SLA monitoring, overdue tickets, and performance summaries.
- Used JavaScript and AJAX for dynamic ticket updates, comments, and filtering without full-page reloads.
- Managed database operations using ADO.NET and SQL Server, applying parameterized queries to support data integrity and safer database access.

CM AccountEase

Technologies: C#, WinForms, ADO.NET, SQL Server

- Developed and maintained a Windows Forms accounting application using C#, ADO.NET, and SQL Server for business operations.
- Worked on party management, inventory, sales, purchases, expenses, cash and bank transactions, and loan account modules.
- Supported invoices, quotations, payment receipts, sales returns, GST calculations, stock tracking, and transaction processing.

Education

Bachelor of Engineering in Information Technology — **2020 – 2024**

Savitribai Phule Pune University, India — CGPA: 7.84/10

Achievements

- Robotics Club Member – Team Jaguar Robotics
- Coding Club Member – ITSA
